

Datasheet

Carbon Filter

Equipment Description

Activated carbon filters are commonly used in water softening systems.

By means of the coconut-based activated carbon mineral in the filter, organic substances in the water are removed by being absorbed into the porous holes on the chemical surface.

High-quality water required in industrial processes is obtained this way.

Advantages

- Performs in high capacity.
- Filters that self clean automatically through PLC.
- It contains within activated carbon as media.
- Ease of Operation
- Low Operational Cost
- Low Energy Cost

Areas of Use

- Drinking Water Treatment
- River Water Treatment
- Wastewater Treatment Plant
