About the Company

Inspired by Germany's engineering excellence and tradition of innovation, Ptech GmbH operates worldwide in the field of water purification technologies. Based in Germany, our company has been providing innovative solutions for both industrial and domestic use since 2023, with a mission to enhance access to clean and sustainable water resources.

Today, as Ptech GmbH, we operate in many countries with our water purification systems, offering our customers high-quality, environmentally friendly, and energy-efficient technologies. The products we develop at our R&D center in Germany contribute to the conservation of water resources and the enhancement of access to clean water worldwide.

With our customer-focused approach, expert team, and global business network, we are here to provide tailored solutions for your water purification needs. We protect water for a sustainable future, bringing technology together with nature.

The Future of Water, Today's Technology.

Our Quality Policy

The foundation of our quality policy is to adopt reliability and friendliness as a fundamental understanding of quality. The primary priority of our policy is to continue our business in this direction by taking advantage of all the benefits brought by technology and time; in the meantime, to consider customer satisfaction and possible demands, as well as new requests in advance.

Quality, responsibility, and customer satisfaction are at the forefront of our principles. Our company aims to be a leader in its field with the understanding of "high quality" established by the total quality management system.

One of our main goals is to prioritize reliability and honesty in the services we provide, to recognize our customers' needs in advance, to create added value, and to ensure a high level of customer satisfaction.

In line with developments in the industry, to lead in product quality and customer satisfaction, the company is committed to organizing continuous training for its employees, who are the essential element of the quality management system, to ensure they provide services with the same precise understanding of quality and to continuously improve the system.

Hello,

We are proud to work with you to solve environmental issues. Our company uses technology that keeps solutions up to date. We are grateful for your trust in us and for choosing us. We look forward to providing you with the best products and services.

Erdem YILMAZ
CEO & Co-Founder

***The Future of Water,
Today's Technology.***

Our Mission

With the knowledge and experience we have gained since our establishment, we are setting up the facilities needed by the Water Treatment Industry and producing customized equipment.

Our Vision

To become a global player that adds value to the world in water and wastewater treatment by continuously growing with our engineering team and machinery platform.

Our Goal

To be a global player in every field we operate in without compromising our reputation and to contribute as a pioneering company to the development of the water treatment industry.

Our Values

Leadership

We will continuously produce to be a pioneering and leading company in all sectors we exist in.

Quality & Performance

We will work to present our products and services to our customers at internationally established standards and to increase our performance with the parameters we follow.

Development, Change

By keeping up with the developments / innovations in our industry and technology, we will enhance our skills and ensure that our companies stay up-to-date.

People

Being honest and respectful towards all our stakeholders, both inside and outside the company, is our common value. It is our group's shared goal to be and nurture individuals who continuously renew themselves and strive to produce better. We act with the knowledge that our employees and managers can reach the goals we focus on through teamwork. We do not include elements that contradict equality, such as religion, origin, or gender, in our recruitment policies and progress based on performance data and merit.

Environment

We will work beyond our legal responsibilities to protect nature and living beings. We will strive to raise our environmental awareness and not to consume our inherent resources.

Our Services

All production activities are carried out in-house. The machinery park in the production area includes sheet metal cutting machines, sheet bending machines, plate rolling machines, CNC machining centers, laser cutting machines, gas metal arc welding machines, and argon welding machines.

Our annual production capacity is 950,000 tons, and we produce innovative solutions in engineering with experienced designers, environmental, electrical, and mechanical engineers. Our engineers plan the facilities by performing process calculations and mechanical calculations.
